

ESfEQA Prepares the Program Portfolio of 2023

The first half of 2022 is now over, and so it is time for us to prepare ESfEQA's product portfolio for 2023. We will continue to offer almost all programs from 2022 next year. Exceptions to this are programs for which there have been very few participants over the past years.

As in previous years, we will continue to grow our portfolio in 2023. The field of molecular diagnostics will be expanded so that the programs for HBV, HCV, HIV and SARS-CoV-2 will be available to all participants throughout 2023.

In the area of serology, ESfEQA already has a very comprehensive range of proficiency tests. A new program 'Legionella Antibodies' is planned for 2023 due to customer inquiries.

The new catalogue with all ESfEQA proficiency test programs is expected to become available in September. If you still have suggestions for new programs for which your laboratory or your customers need proficiency tests, we look forward to receiving your message as a comment on LinkedIn or as an e-mail to info@esfega.eu.

With our high-quality proficiency testing services, we look forward to being a part of your quality assurance in the laboratory!
